Hello Tony and Craig,

I have attached the highlighted and clean copies of the updated master label to include the new alternate brand name **Ferbam 76WDG**. The consultant I use to do state registrations thinks that having the actual updated alternate brand name on the master label would make state approvals easier. The only change made to this label is the deletion of the old ABN, **Ferbam 76 WDG**, and the addition of the new ABN, **Ferbam 76WDG**. If you could use the attached labels to complete your review of our label amendment I would greatly appreciate it. Could you also reference the updated alternate brand name in the response letter from EPA? This should eliminate any issues at the state level. Again, I really appreciate your assistance.

Regards,
Jessica

OK Craig will process your request. We don't need a label for an ABN (we don't stamp labels with ABNs) but will use the pending version Craig has now assuming it has the primary brand name on it Ferbam Granuflo.

Many Thanks,
Tony Kish

Hello Tony,

I really appreciate your assistance with this little issue. I would like to permanently replace "Ferbam 76 WDG" with "Ferbam 76WDG". Should I send you both an updated highlighted and clean version of the master label for EPA Reg. No. 45728-7 that incorporates this change?

Thanks again,
Jessica

Jessica- I see Craig has your pending amendment due 11/10/16 and that Kyrssa approved the ABN "Ferbam 76 WDG" on 6/16/16. You can change the ABN as part of the amendment with Craig. Let us know whether you want to

A. Add "Ferbam 76WDG" as yet another ABN, keep "Ferbam 76 WDG" as an ABN, and later request deletion by notification of "Ferbam 76WDG"

or

B. Want "Ferbam 76WDG" to replace permanently "Ferbam 76 WDG" as an ABN, or other strategy

Many Thanks,
Tony Kish

Subject: Taminco US LLC, Label Amendment for EPA Reg. No. 45728-7

Hello Mr. Kish,

I hope you are going well. We recently submitted a label amendment for EPA Reg. No. 45728-7, Ferbam Granuflo Fungicide. I have a question regarding the alternate brand name that is already approved on the master label. We added the alternate brand name **Ferbam 76 WDG** earlier this year so that we could have multiple brands of this one product. However, when the pre-printed bags were printed the brand name was printed as **Ferbam 76WDG** without the space between the 76 and the WDG. We know that some states will push back on this and potentially reject the label because it is not 100% consistent with the approved brand name on the master label. Is there any way I can modify the existing alternate brand name to make it consistent with the pre-printed bags? My hope is that I can do this while it is still pending with EPA. I can send you an updated label that captures all of the currently changes for the amendment and modify the alternate brand name. Please let me know if this is possible. I appreciate any guidance you can give me.

Regards,
Jessica McLaughlin
